

Press release

Marseille 12 December 2017

The competitiveness cluster Capenergies and GreenUnivers, the leading French media dedicated to the energy transition markets, organize the 1st European forum dedicated to innovative energy solutions for electric mobility on February 15/16th 2018 in the *Palais du Pharo* of Marseille.

From private to public transport, electric vehicles are already the tomorrow's solution for sustainable urban mobility. Their development needs to rely on a secure, competitive and clean local energy. This is the core issue of the Forum Energy for Smart Mobility, an opportunity to share views and make business.

4 main topics:

- Renewable energy feeding, charge optimization and storage
- Digital solutions for energy management and blockchain
- Business models and operators governance
- Vehicle-to-Grid

3 leading countries partners of the Forum: Denmark, The Netherlands and Germany will come and share experiences and innovative projects.

300 experts will gather in Marseille: CEOs from global companies, start-ups, SMEs, mid-caps, local authorities dedicated in smart grids development for next generation energy-based solutions for mobility.

A 2-days innovative programme: keynote speeches on energy-related challenges for tomorrow's mobility, workshops, start-ups awards, B2B meetings – and more.

A business-oriented forum which aims to become the major meeting for energy and e-mobility actors.

The Energy for Smart Mobility Forum has already received the support of major partners including the Provence-Alpes-Côte d'Azur Region, the Aix-Marseille Provence metropolis, the French national Agency for Environment and Energy management ADEME, private groups like EDF, Enedis, Omexom, Demeter Partners, Watson Farley & Williams...

The Energy for Smart Mobility Forum will foster relationships between the 4 main stakeholders involved in the energy and mobility ecosystem: innovative firms, public authorities, investors and researchers.
