

GREENFLUX

Year of creation	2011
Country	The Netherlands
Website	greenflux.com
Contact	Esra Degens esra.degens@greenflux.com
Concept description	<p>GreenFlux offers a total solution for the management of charging infrastructure for electric vehicles, which can be used by charging operators all over the world. We support energy companies, network operators and parties in the automotive sector to manage charging points remotely, process transactions and adjust the charging process to the capacity of the electricity grid. We are a leader in smart charging technology and believe in open standards and interoperability. Our solutions can be integrated with all charge stations and are compatible with all electric vehicle charging platforms.</p>
Company stage	<p>GreenFlux is currently in the stage of scaling up all activities. We have recently acquired several large customers and are implementing our smart solutions in several continents.</p>
Main partners	<p>Our main partners are: Energy companies (such as Total) Grid Operators (such as UK Powernetwork) Charge Point Operators (such as Pitpoint) Charge Point Manufacturers (such as Alfen and EVBox)</p>
Main objectif for applying to E4SM's awards	<p>We would take this unique opportunity to achieve exposure, build our network and accelerate our development in smart solutions</p>
